Forced action mixers, conveyors and tools
for landscape gardeners and paviours

www.baron-mixer.com

Designed in Denmark and produced in the EU

Advanced, durable and user friendly

Forced action mixers, conveyors and tools for landscape gardeners and paviours

BARON A/S is a 100% Danish owned, dynamic and innovative company, and we have positioned ourselves as the absolute market leader within forced action mixers, conveyors and tools for landscape gardeners and paviours.

Forced action mixers

Baron produces powerful and efficient forced action mixers for the demanding, professional user. Large, low-noise motors and high quality gears ensure that your Baron forced action mixer keeps on working.

Conveyors

Baron produces the by far most robust conveyor series on the market. The CU and CCU-series are developed in a co-operation between our own development department and a number of our most demanding customers within the rental and construction industry.

This ensures that our conveyors live up to even the most strict requirements for durability, strength and maintenance.

Tools for landscape gardeners and paviours

Baron is specialized in tools for landscape gardeners, contractors and paviours. The surface levelling system and the screed roller bar from Baron ensures on a daily basis that the users can deliver a quicker and more smooth construction work.

The tools are under constant development in close co-operation with the engineers and designers at Baron and in close dialogue with our customers.

Forced action mixers from Baron are in uncompromising quality

We have produced forced action mixers since 2006. The vision was from the beginning to develop a range of forced action mixers in an uncompromising quality to the professional user. We think that we have achieved this goal.

We always focus on function, safety and ergonomics, which means that we today offer mixers of an extremely high quality and efficiency.

Through constant development and with the knowledge that even the smallest details are of importance, we have reached a unique position on the world market and today we export to more than 40 countries.

The latest news is the development of the EasyClean® system, which makes the cleaning of the mixers very easy, saves time and extends the life span.

The ultimate forced action mixer

M-LINE

Quality, efficiency and durability combined with a range of unique product details make the M-series the right choice for the demanding, professional user.

Large, low-noise motors and high quality gear ensure that your Baron mixer just keeps on going. Shielding of the motor protects against dirt and prolongs the lifetime of the motor and the gear.

BARON M80

- Superiour surplus of power
- Automatic emptying
- Robust bucket support
- Easy removable mixer head
- Interchangeable mixer shovels
- Large pneumatic wheels make the mixer easy to move

BARON M110

- Security switch when opening the cover
- Positioning bolt secures the cover during use
- Motor shield protects against dirt
- Easy and efficient handling
- Adjustable mixer shovels
- Rubber shovels as accessories

BARON M200

- Can be operated by one man
- Large, low-noise motor
- Optimum mixing capacity and handling
- Security protection at the outlet
- Easy to clean
- Optimize efficiency by combining with our 2,5 m conveyor

BARON M300

- 4KW motor with plenty of power
- Maintenance free high quality gear
- Motor shield protects against dirt
- Transport arm with tow coupling
- Lifting brackets and truck fittings
- Powerful, durable container

Accessories for M-Line:
Rubber shovels,
CE-extension cable
and dust lid.

Powerful and efficient forced action mixers at the right price

E-LINE

The right choice for the demanding, professional user. Here you get the best value for money without making any compromises on the well known Baron virtues. Quality, durability and efficiency comply completely with even the highest demands.

BARON E90

- Large motor with plenty of power
- High quality and finish
- Interchangeable mixer shovels
- Automatic emptying of container
- Large transport tyres make it easy to load the mixer
- Pneumatic wheels for better comfort

VARIO! E90 can be delivered with Variospeed as an option. The speed of the mixer can vary from 0-55 r.p.m.

BARON E120

- Efficient and easy handling
- Security switch on the lid provides high security
- Adjustable mixer shovels
- Long lifetime
- Easy to clean
- Positioning bolt secures the cover during use/transport

VARIO! E120 can be delivered with Variospeed as an option. The speed of the mixer can vary from 0-55 r.p.m.

BARON E200

- Large and very robust 2.2KW motor/gear
- Can be operated by one man
- Optimum performance and handling
- Easy to clean and maintain
- Quick, efficient mixing and large capacity
- Easy to load in combination with our 2.5 m conveyor

BARON E300

- 4KW motor with extremely power reserve
- Maintenance free high quality gear
- 3 telescope legs make the mixer very stable
- Lifting brackets and truck fittings
- Powerful, durable container

Accessories for E-Line:
Rubber shovels, transport arm with tow coupling, CE-extension cable and dust lid.

EasyClean® - time is money

**Get rid of the hard
cleaning and spend
your time better**

EasyClean® is a lining which fits the BARON forced action mixers and which reduces the cleaning time considerably

Furthermore your fantastic BARON forced action mixer lasts even longer, as it can be completely clean and doesn't need strokes and sandblasting in order to remove the set remains

The EasyClean® system is developed based on feedback from customers and end-users, who think that they spend too much time on cleaning the forced

action mixer, especially if the mixer is not cleaned directly after use.

EasyClean® is an optimum system, when you mix with glue eg. for floorings or rubber granules. The only thing you need to do now, is to remove the lining after use and the mixer is immediately ready for the next task.

The time you save on cleaning, can now be used for production!

Forwards, backwards, variable speed and series connection

New, powerful motor and advanced steering extend the possible applications for the conveyors

(BARON

www.baron-mixer.com

CU 4500

Baron's new range of conveyors contains many new facilities, which increases the possible applications.

The frequency converter makes it possible to use a powerful 3-phase motor, even though the power supply is 1-phase. Furthermore the frequency converter makes it possible to vary the speed from 20 to 80 cm/sec and runs both forwards and backwards.

The new conveyors can be connected in series with up to eight conveyors at the time and are available in the editions CU (ConveyorUnit)

and CCU (ConveyorControlUnit). The CCU* is required, if you want to make a series connection, as this is used for steering of the other conveyors.

The new functions open up to new applications. The target group for the conveyors is thus significantly larger.

A good example is in connection with excavation of basements, where the conveyors can be used for removal of materials and afterwards the direction can be changed and concrete can be transported into the basement.

Baron Conveyors CU and CCU

The most robust and most usable
range of conveyors in the market

As good as it gets!

The most robust range of conveyors in the market is now available.

The Baron-series is developed in co-operation with our own development department and a number of our most demanding customers within equipment rental and the construction sector. This ensures that the CU and CCU-series in reality live up to even the strictest requirements for durability, strenght and serviceability. The closed side profile provides extremely high loading capacity while the security stays completely in the top.

A Baron conveyor can be used for all kinds of tasks from the hard decomposition, wet mortar, transportation of soil etc.

IMPORTANT! Our machines comply with the latest CE approval standards according to applicable EU-Directives.

BARON CU & CCU-LINE

- Extremely high loading capacity and durability
- High pulling power
- Easy to clean
- The hopper is movable and removable
- Heavy duty PVC-belt
- Easy adjustment of the belt
- Superior quality and finish
- Closed side profile
- High security level
- Build in electrical parts, which are well protected
- Fork lift brackets
- Aluminum construction
- Low weight
- Stackable
- Long lifetime
- Quick and easy to maintain
- Withstands heavy load and handling
- Heavy and movable chassis
- Can be used for all kind of tasks
- Low maintenance costs

Accessories for CU & CCU-Line:

Undercarriage, hopper
CE-extension cable, cables for
series connection and various
types of carriers.

Tools for landscape gardeners and paviours

Practical and ergonomically correct

Baron surface levelling system and screed roller bar make it easy to level sand and gravel

The Baron surface levelling system and the screed roller bar replace the well-known methods for levelling of sand with eg. strings, pipes, boards etc.

- You can carry out your work far more effective and accurately
- You can level even large areas quickly and easily
- The correction slide will level at the same height as the underside of the side bar
- No after repair is needed in the area, where the side bar was placed
- After basic setting of height and gradient, is it easy to make both side shifts and length shifts
- With our ground spikes you can easily adjust both gradient and levelling height
- The screed roller bar has a working width from 1.5 m up to 3.0 m and can be used for all kinds of levelling tasks
- Large pneumatic wheels ensure extremely powerful and efficient sand levelling of both minor and larger areas
- The aluminum handle gives you lots of power in precisely the right height and ensures the right working position at any time

Baron paver angle ensures accurate depositing

The paver angle ensures that you can easily keep the right angle even on large paving areas. Remember to place the angle with the grooves downwards against the ground, so it is completely stable. You can work faster and more precise with a Baron paver angle.

Baron Vario makes repair of stone paving very easy

Baron Vario is perfect for repair of pavements and other areas with paving stone. Baron Vario makes it easy to lay down a paving stone with a different thickness compared to the one, which it will be next to. The height of the support legs can be adjusted in the sides from 0 - 10 cm, so the height matches the thickness of the tile/stone, which has to be laid down. At the same time, you will have the possibility to vary the width, as the lug plate is made double and is shiftable.

Baron hand rammer is perfect for smaller areas

The Baron hand rammer is a new series of rammers, which includes a standard rammer, an angle rammer, which is especially suitable for compression around tubes and three square rammers.

All three Baron square rammers are equipped with an anti-shock membrane, which reduces the vibrations, which otherwise will transmit to the arms and shoulders.

The square rammer 200 PUR is equipped with a PUR coating, which makes it especially gentle and suitable for stones and tiles.

Available in more variants, see demo video on our website.

Tools for landscape gardeners and paviours

Practical and ergonomically correct

Baron concrete judder makes it easy to level concrete

The Baron concrete judder is the perfect tool for levelling of large and smaller surfaces. The tube has a diameter of 110 mm and is delivered in PVC in the following lengths:

- 1000 mm
- 1400 mm
- 1800 mm

Available with the following handles

- Steel hackel handle
- Wooden handle with fork

Baron Snap Edge – the professional paver edge restraint, which meets any demand

- An easy and economical solution for securing all types of edges where there is a risk of shifting
- The same piece is used for straight lines and inside and outside curves
- Connectors incorporated into the profile
- A standard length of 224 cm makes for quick installation
- No prior planning required for curves and corners
- The open design allows for planting close to paths
- Designed to provide strong paver edging for all types of pavers and borders
- Full-length spike holes so the spikes can be hammered right through the edge restraint
- No need to reinforce your edges
- Ideal for making tree rings of any size
- Perfect for sharp borders between lawns and beds
- Keeps wood chips and granite chippings in place

When only the best is good enough

All Baron products are produced by Baron A/S in Denmark and meet the strictest requirements for function, quality, efficiency, durability and security.

All our products are developed by our own engineers and designers in close co-operation and dialogue with our customers. The products are not launched until after thorough testing.

Baron A/S has a clear goal to be the market leader within our product range. We ensure this goal through targeted product development and strict quality control.

With focus on innovation, design and competitive solutions, we always offer the right product at the right price.
