

ESSDRIVE Extension including N7 autofeed

Area of Application

ESSDRIVE extension for installation of straight collated screw 25-55 mm. The extension is a tool that facilitates the installation of e.g. flooring grade chipboard, floor/ceiling drywall and decking screw installation, etc.

Description

An adapter is fitted on the screwgun according to the enclosed instruction followed by

the extension on the adapter.

NOTE! The adapter is sold separately in its own packaging.

The autofeed piece is extremely reliable and features easy setting of the screw length and fine adjustment of the screw's insert depth.

The ESSDRIVE set includes:

- N7 autofeed nose
- extension tube including support handle
- bit extension
- 1 x bit Ph2 x 164 mm (for Makita FS2300)
- installation instruction
