5 Production phase

Resource utilisation and environmental impact during production of the item is reported in one of the following ways:							
1) Inflows (goods, intermediate goods, energy etc) for the registered product into the manufacturing unit , and the outflows (emissions and residual products) from it, i.e. from "gate-to-gate".							
2) All inflows and outflows from the extraction of raw materials to finished products i.e. "cradle-to-gate".							
3) Other limitation. State what:
